The Smart Thermostat for
Affordable Housing

Thermostat Programming Guide

Welcome to the **Switchee** programming guide

You can set up to four time periods per day to program your heating and hot water. Alternatively, you can use **Switchee**'s pre-set profiles which are based on common times you might want your heating and hot water to be turned ON and OFF.

If the **Switchee** does not control your hot water, you don't have to worry about the hot water-related controls and instructions.

Accessing the Programmer

To programme your Heating and/or Hot Water first you need to touch your **Switchee Screen**.
Then press the **Settings (spanner) icon**.

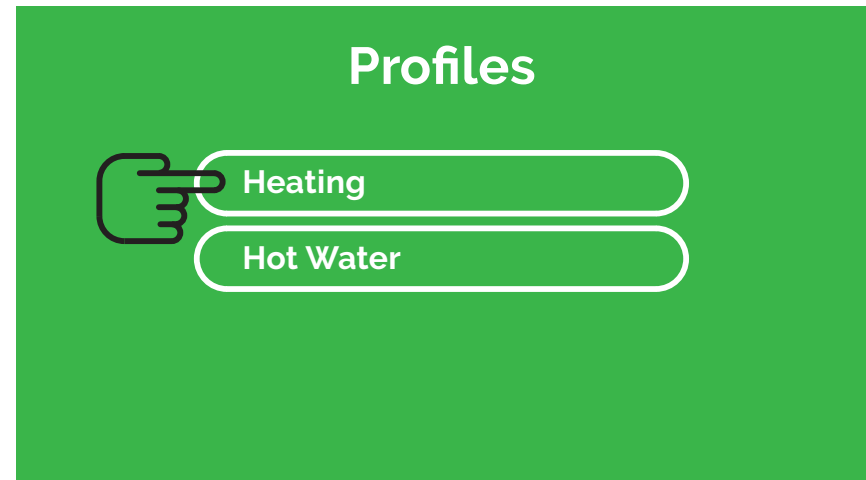

Programming your Heating

①

Activate your **Switchee** by pressing the **Screen**. Press the **Settings** (spanner icon) button located at the top-left of the **Screen**. In the **Settings** menu select **Programmer**. This will take you to the **Profiles** menu.

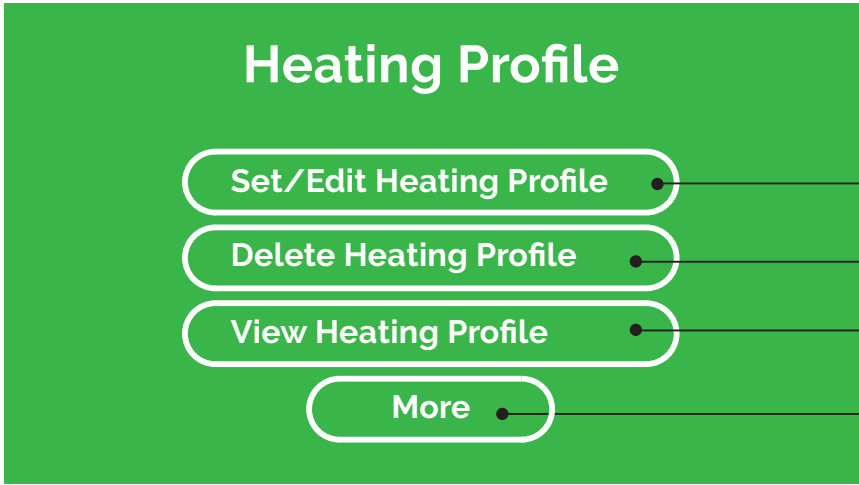

②

There you will see two options (if your hot water is controlled by **Switchee**).

Press **Heating**.

This takes you to the **Heating Profile** menu.

Go to...

page 6

page 10

page 11

page 12

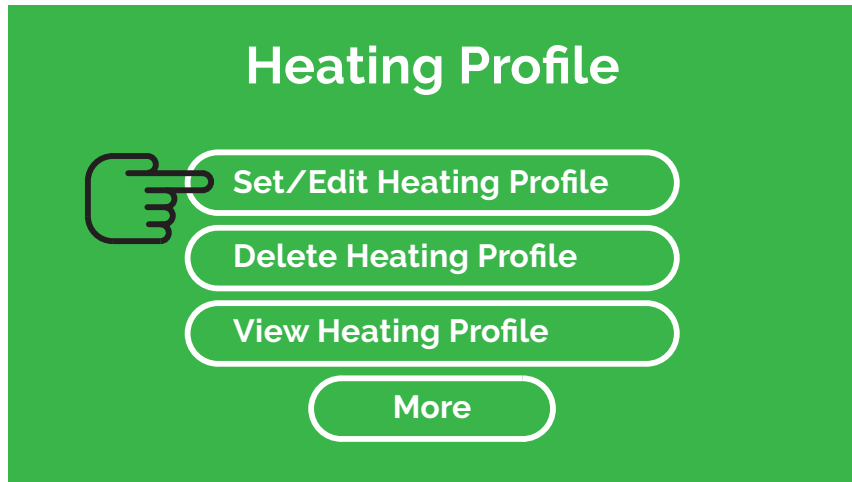

③

Here you can **Set/Edit**, **Delete** or **View** your own **Heating Profiles**. You can also find our **Pre-set Profiles** by selecting **More**.

Instructions for each action can be found on the pages shown.

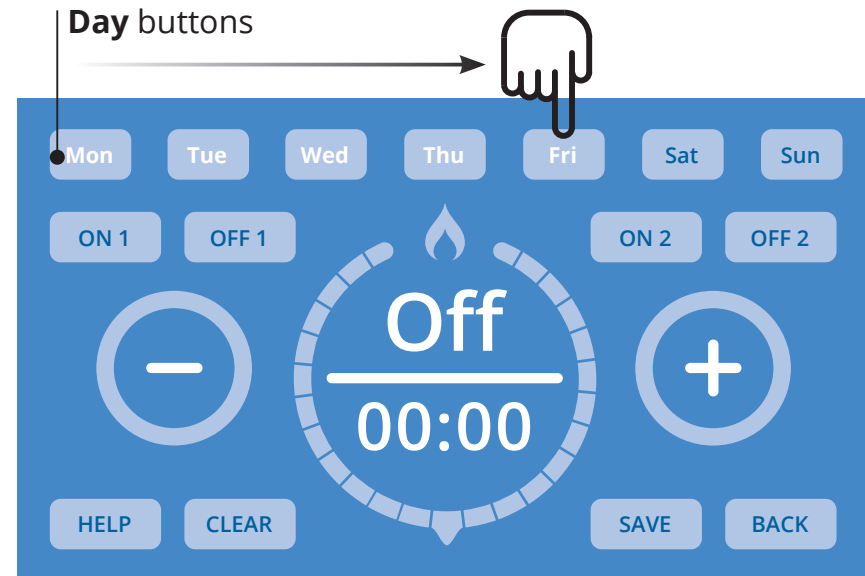

Set/Edit your own Heating Profile

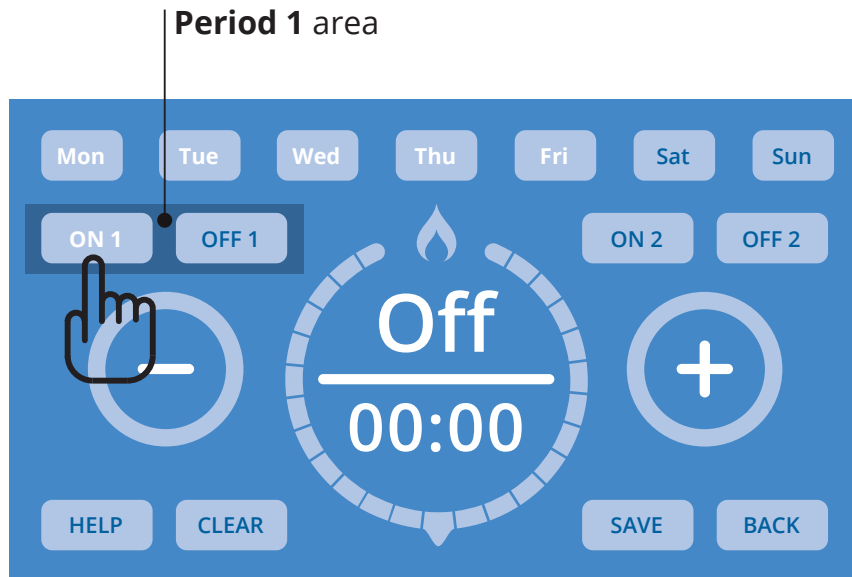

①

Go to the **Heating Profile** menu. Select **Set/Edit Heating Profile**.

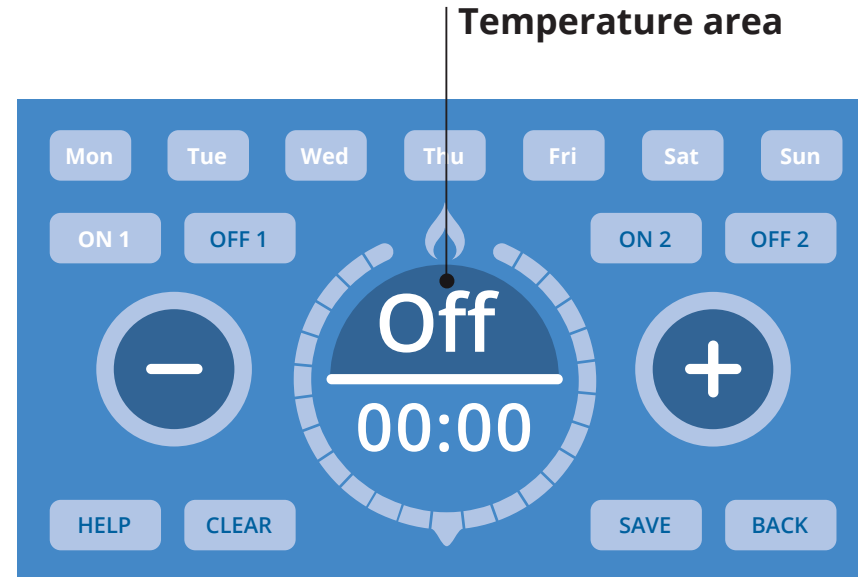

②

Press the **Day** button/s you would like to set a **Heating Profile** for. Select multiple **Days** to set a **Profile** for them all at once. The **Day(s)** you select will flash white.

③

To program when you want your first heating period of the day to come on, press the **ON 1** button in the **Period 1** area.

④

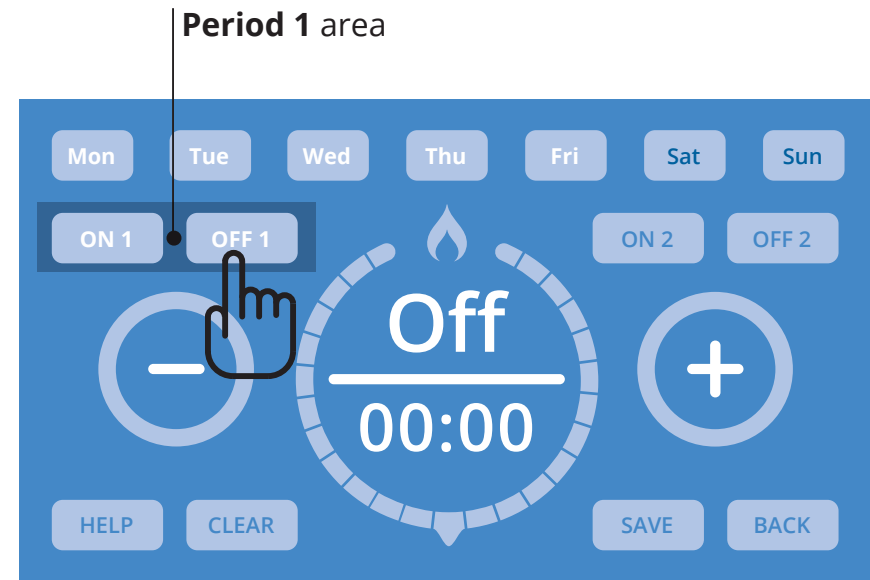

Press the **Temperature** area (shows **Off** as factory setting) inside the **Circle**. Use the **+** / **-** buttons to set your desired **Temperature**.

⑤

Press the **Time** area and use the **+** / **-** buttons to set the **Time** (in 5 minute increments) – this is the time your heating will come ON...

Press **SAVE** to set these **Time** and **Temperature** settings.

⑥

Now press **OFF 1**.

OFF 1 covers the settings for when you want your heating OFF in the first period of the day.

Set the **Time** and **Temperature** settings you want for this period as you did in steps ④ and ⑤.

⑦

To set a second period when your heating turns ON and OFF, use the **ON 2** and **OFF 2** buttons in the **Period 2 area**. Set these in the same way you did previously with the **ON 1 / ON 2 / Time / Temperature** buttons – as shown in steps ③④⑤⑥.

Then **Save** as before.

HELP

HELP button

Press to view **Switchee's** contact information if you have any questions.

CLEAR

CLEAR button

Press to clear **TIME** currently shown.

Note: This will NOT clear all of your set **TIME/S**.

To clear all of your set **TIME/S** return to the **Heating Profile** menu and press **Delete Heating Profile**.

SAVE

SAVE button

Press to save the **Profile** currently shown on your screen. If multiple **Days** are selected, the **Profile** will be saved for all selected **Days**. To view saved **Profile** follow instructions on page 11.

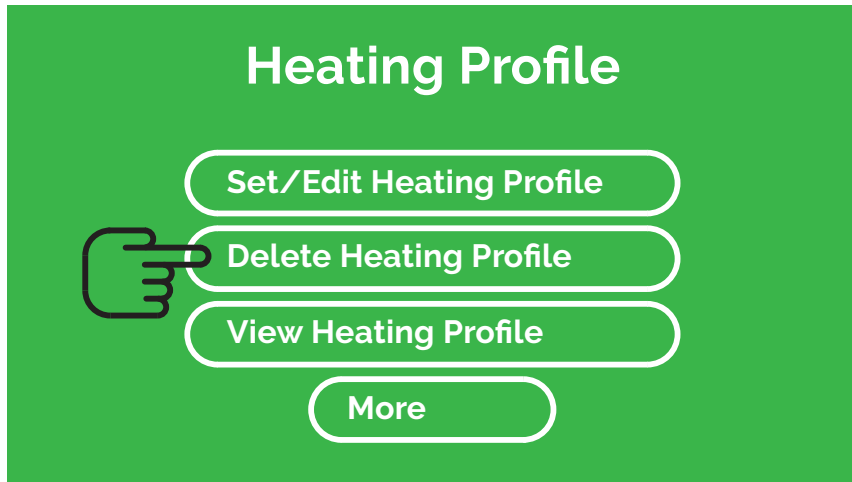

BACK

BACK button

Press to return to the **Profiles** menu without saving the **Profile**.

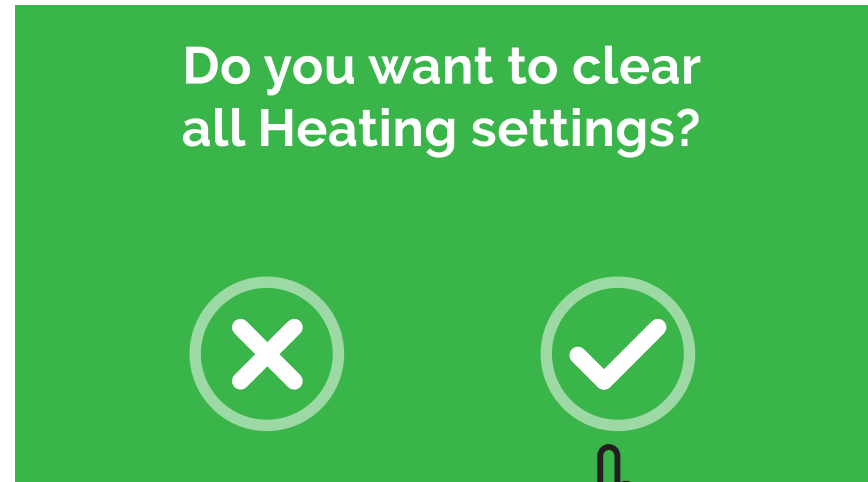

How to delete an existing Heating Profile

①

On the **Heating Profile** menu press the **Delete Heating Profile** button.

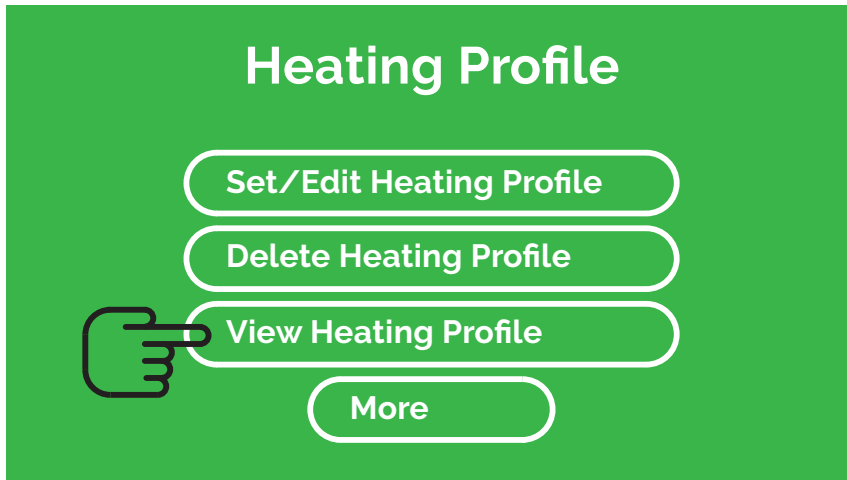

②

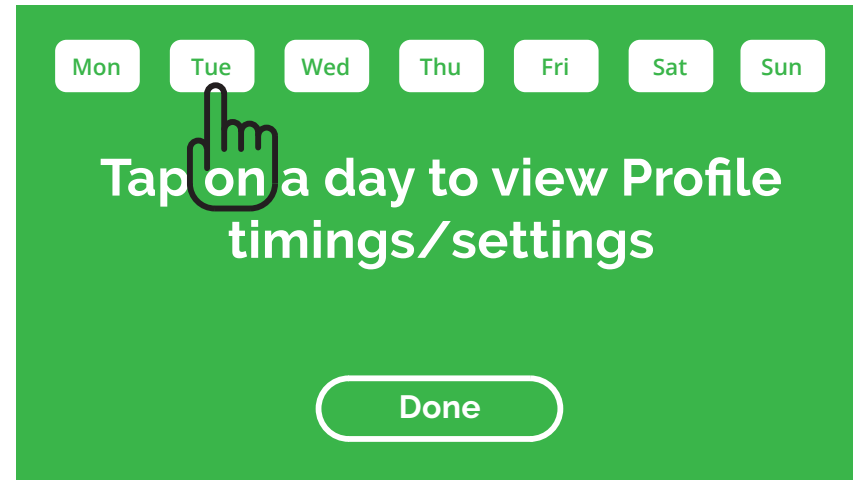

Press the **Tick** button to delete all of your existing **Heating Profiles**.

Note: You will not be able to undo this action once it is completed.

How to view your Heating Profile

① To view a **Profile** you have already set go to the **Heating Profile** menu. Press the **View Heating Profile** option.

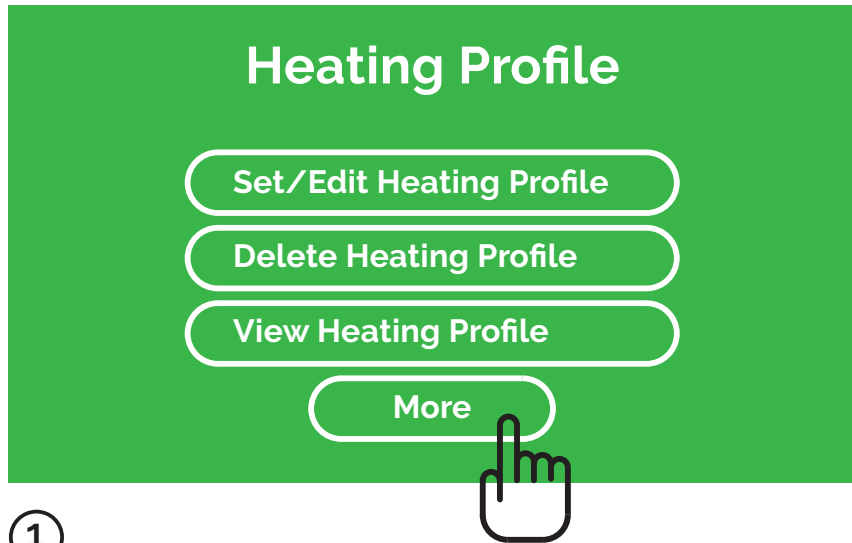

② To view the **Profile** for each day, press the relevant **Day** button/s. When you have finished Press **Done**.

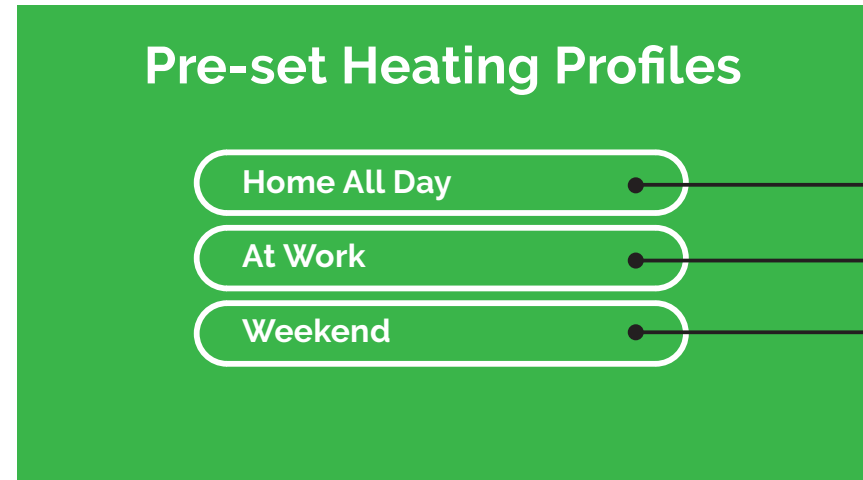

Using Switchee's Pre-set Heating Profiles

If you don't want to set and use your own heating profiles, you can use **Switchee's Pre-set Heating Profiles**.

①

To access the **Pre-set Heating Profiles** go to the **Heating Profile** menu. Press **More**.

②

Select your preferred **Profile**. Profile details are shown opposite. You can program both the **At Work** and the **Weekend** profiles: select one after the other.

Warning: If you select a **Pre-set Heating Profile** it will overwrite your existing **Profile**.

• Home All Day

Monday - Sunday 

	ON 09.00 21°C	
		OFF 21.00 5°C

• At Work

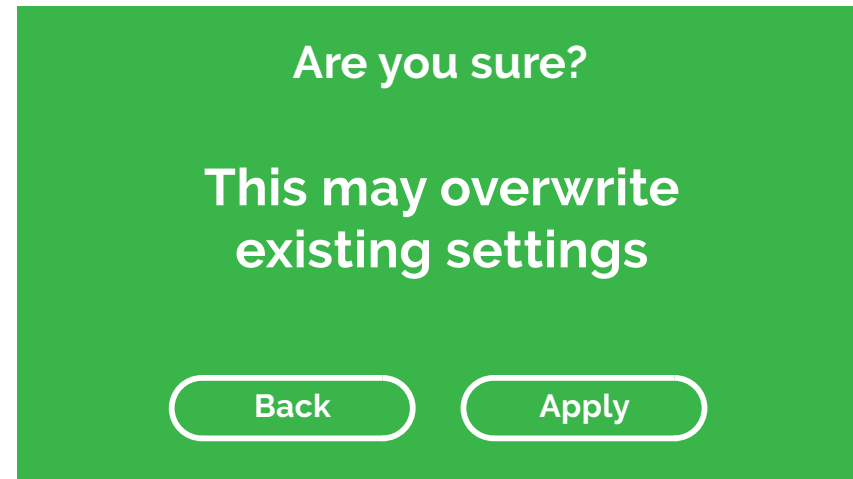

Monday - Friday 

	ON 06.00 21°C	OFF 08.00 5°C
	ON 17.00 21°C	OFF 21.00 5°C

• Weekend

Saturday and Sunday 

	ON 07.30 21°C	OFF 09.30 5°C
	ON 18.00 21°C	OFF 22.00 5°C

③

A menu will appear with a warning:

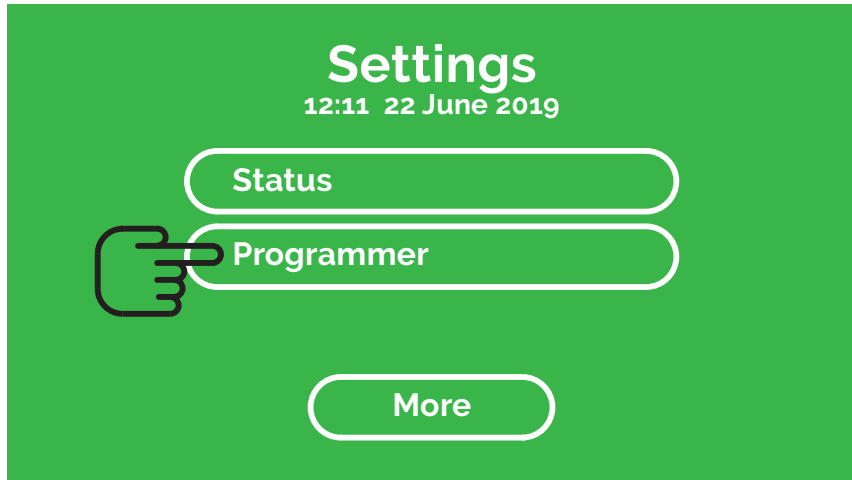

- select **Apply** to proceed with the **Profile** you have chosen, or
- select **Back** to go back to the previous menu.

Programming your Hot Water

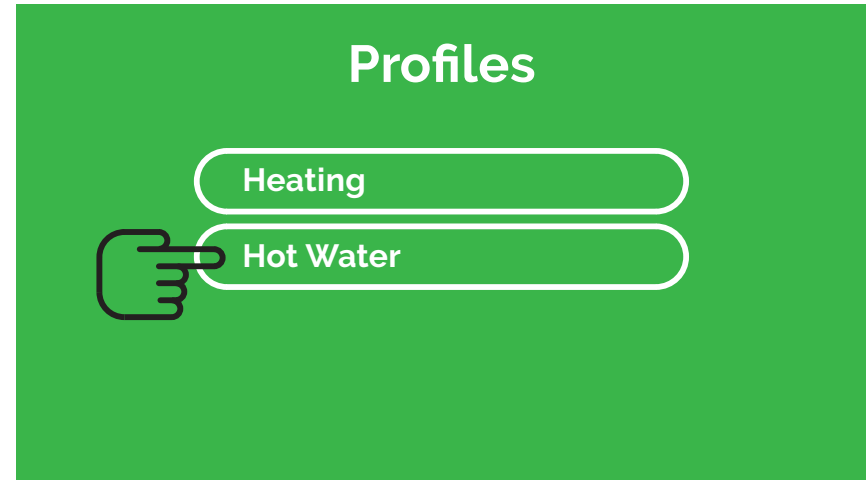

IMPORTANT

If the **Switchee** does not control your hot water, ignore this section.

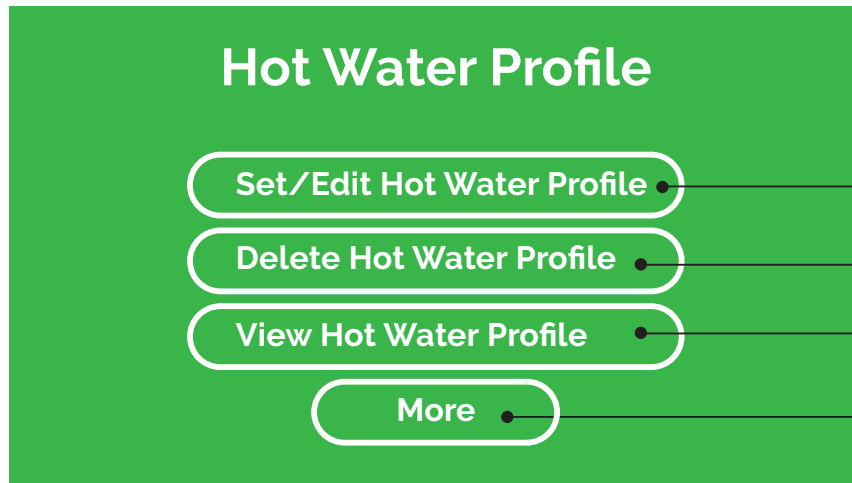

①

Activate your **Switchee** by pressing the **Screen**. Press the **Settings** (spanner icon) button located at the top-left of the **Screen**. In the **Settings** menu select **Programmer** which will take you to the Profiles menu.

②

You will see two options (if your hot water is controlled by **Switchee**). Press **Hot Water**. This takes you to the **Hot Water Profile** menu.

Go to...

➤ page 16

➤ page 20

➤ page 21

➤ page 22

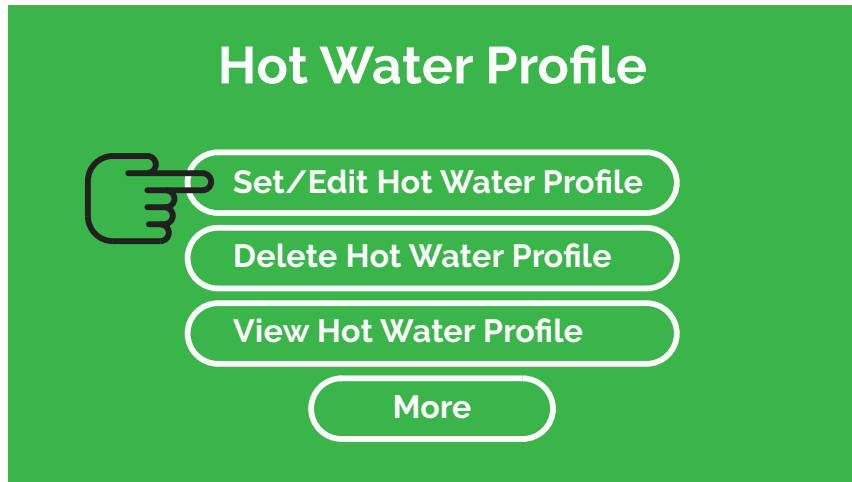

③

Here you can create/edit, delete or view your own **Hot Water Profiles**. To find our **Pre-set Profiles** select **More**.

Instructions for each action can be found on the pages shown.

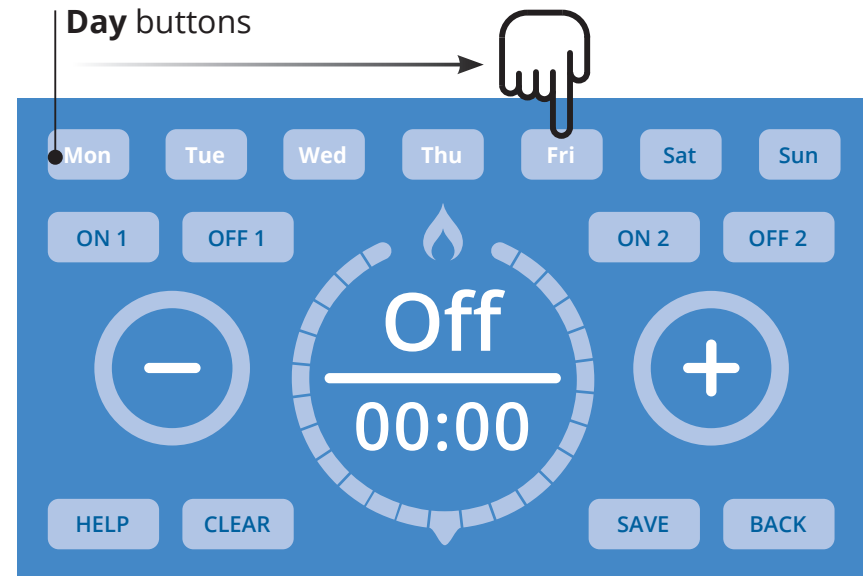

Set/Edit your own Hot Water Profile

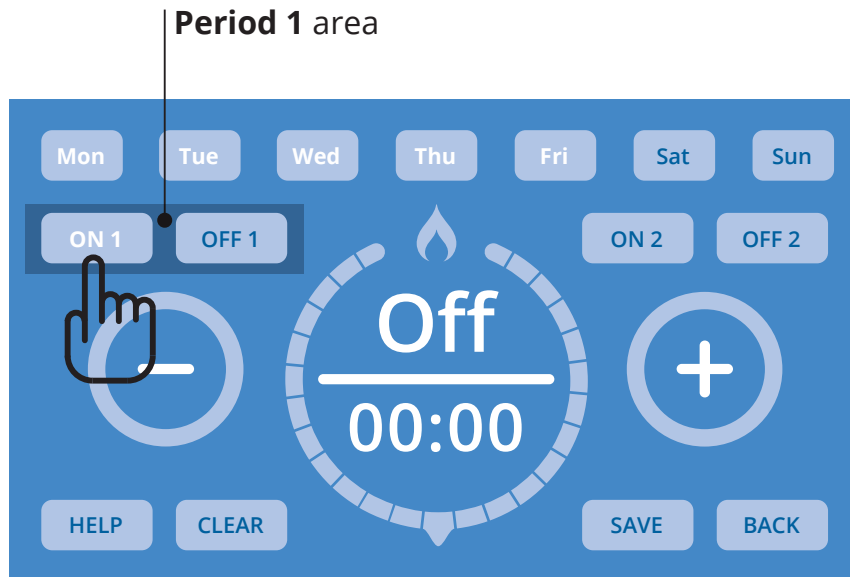

①

Go to the **Hot Water Profile** menu. Select **Set/Edit Hot Water Profile**.

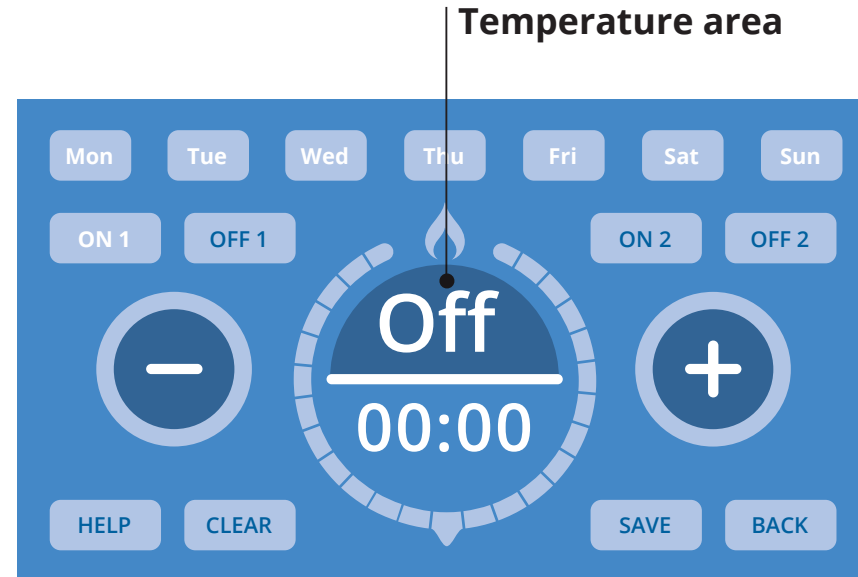

②

Press the **Day** button/s you would like to set a **Hot Water Profile** for. Select multiple **Days** to set a **Profile** for them all at once. The **Day(s)** you select will flash white.

③

Press the **ON 1** button to program when you want your first hot water period to turn ON.

④

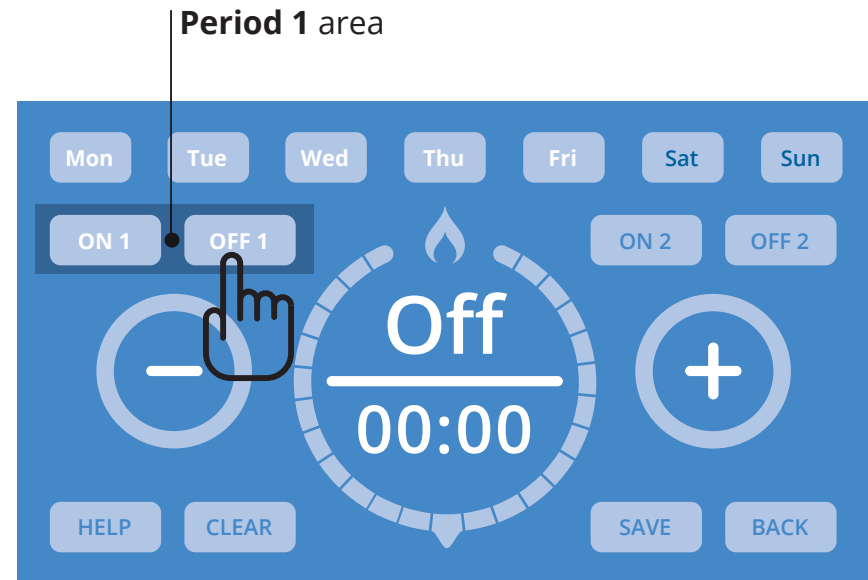

Press the **Temperature area** (shows **Off** as factory setting) inside the **Circle**. Use the **+** / **-** buttons to set whether you would like the boiler On or OFF at that time.

⑤

Press the **Time** area and use the **+** / **-** buttons to set the **Time** (in 5 minute increments) - this is the time your hot water will come ON.

Press **SAVE** to set these **Time** and **Temperature** settings.

⑥

Now press **OFF 1**.

OFF 1 covers the settings for when you want your hot water OFF in the first period of the day.

Set the **Time** and **Temperature** settings you want for this period as you did in steps ④ and ⑤.

⑦

To set a second period when your hot water turns ON and OFF, use the **ON 2** and **OFF 2** buttons in the **Period 2 area**. Set these in the same way you did previously with the **ON 1 / ON 2 / Time / Temperature** buttons – as shown in steps ③④⑤⑥.

Then **Save** as before.
